

DAILY DRILLING REPORT: WELL 15/9-F-12

OPERATOR: STATOIL ASA | FIELD: VOLVE | REPORT DATE: 2008-01-28

Well ID	15/9-F-12	Spud Date	2008-01-10
Latitude	58.4410 N	Longitude	1.8890 E
Current Depth	2510.0 m	Target TD	3350.0 m

24-Hour Operations Summary & Significant Events

Formation Tops: Entered Hugin Formation sandstone at 2410.0 m MD (gas bearing). Casing Program: 9-5/8 inch intermediate casing (47 ppf) previously set at 2480.0 m MD and cemented to 1750 m MD TOC with 250 bbl Class G cement. Mud Program: 8-1/2 inch hole section drilled using 1.50 SG OBM from 2480 m to current depth. On 2008-01-28 at 2510.0 m MD in the Hugin Formation, a gas kick was taken while drilling 8-1/2 inch hole section. Pit volume gain of 12 bbl observed with flow rate increase. Action taken: Shut in well on annular BOP; circulated out influx using Driller's Method.
